

Works notification

Ballarat East Zone Substation Works update November 2025

Powercor is building a new substation in Ballarat East to enhance the city's energy network and ensure ongoing reliable power access for homes and businesses.

Works

In November and December, at our site at 203 York Street (see map on the next page), we will continue to receive equipment deliveries, complete electrical fit out works and carry out minor civil works such as digging foundations and pouring concrete. We will also have a crane on site to lift in the sound wall panels for the transformer.

When

Weekdays between **7am and 5pm**.

Footpath temporary closure

During **November and December 2025** the footpath between our site at 203 York Street and Pennyweight Gully will remain closed to allow us to continue works around this location.

Bus stop relocation

The Pennyweight Park/York Street bus stop on Route 20 (towards Canadian) will remain relocated 20 metres before its original position.

What to expect

- Large machinery, including cranes, excavators, trucks and other specialised equipment, will be used throughout the works.
- Trucks will be frequently moving in and out of the site during construction hours, primarily via our Callow Street/Larter Street entrance heading towards Main Road.
- Ongoing deliveries of electrical equipment and materials will occur, with traffic management in place when needed.
- Some works may generate noise at times.
- Powercor crews and authorised contractors will carry out all works.
