Ballarat East Zone Substation Works update January 2026

Powercor is building a new substation in Ballarat East to enhance the city's energy network and ensure ongoing reliable power access for homes and businesses.

Works

In January and February, at our site at 203 York Street (see map on the next page), we will continue to receive equipment deliveries, complete electrical fit out works and carry out minor civil works. We will also have a crane on site to lift in the new transformer.

When

Weekdays between **7am and 5pm**.

Some weekend work is expected between **8am and 5pm** from Saturday 31 January and across February.

Underground cable installation

We will be installing new underground power cables in York Street, Larter Street and Callow Street, as shown on the map overleaf. These works will take place outside our site and are required to connect the new zone substation to the existing electricity network.

Footpath temporary closure

The footpath between our site at 203 York Street and Pennyweight Gully will remain closed to allow us to continue works around this location.

What to expect

- Large machinery, including cranes, excavators, trucks and other specialised equipment, will be used throughout the works.
- Some works on York Street, Larter Street and Callow Street may cause some minor traffic and access impacts. Our on-site crew will work directly with any affected residents to manage these impacts.
- Trucks will be frequently moving in and out of the site during construction hours, primarily via our Callow Street/Larter Street entrance heading towards Main Road.
- Ongoing deliveries of electrical equipment and materials will occur, with traffic management in place when needed.
- Some works may generate noise at times.
- Powercor crews and authorised contractors will carry out all works.
