

Works notification

Ballarat East Zone Substation Works update September 2025

Powercor is building a new substation in Ballarat East to enhance the city's energy network and ensure ongoing reliable power access for homes and businesses.

Works

We will be finishing the final stages of earthworks and sewer relocation works at 203 York Street (see map on the next page). We will also start preparing the site for the installation of buildings and other power equipment.

When

Weekdays between **7am and 5pm**.

Footpath temporary closure

During **September 2025** the footpath between our site at 203 York Street and Pennyweight Gully will be closed temporarily to allow us to complete sewer relocation works.

Bus stop temporary relocation

The Pennyweight Park/York Street bus stop on Route 20 (towards Canadian) will remain temporarily relocated 20 metres before its original position until the last service on Tuesday, 30 September 2025.

What to expect

- General earthworks and sewer relocation works will take place within our site and along the closed footpath area.
- Large machinery, including excavators, trucks and specialised equipment, will be used throughout the works.
- Trucks will be frequently moving in and out of the site during construction hours, primarily via our Callow Street/Larter Street entrance heading towards Main Road.
- Onsite buildings and other equipment will be delivered and installed, with traffic management in place as required.
- You may also notice some power line works taking place on York Street, Callow Street, Otway Street South and the nearby surrounds during this period.
- Some works may generate noise at times.
- Powercor crews and authorised contractors will carry out all works.
