Works notification

Ballarat East Zone Substation Project update October 2025

Powercor is building a new substation in Ballarat East to enhance the city's energy network and ensure ongoing reliable power access for homes and businesses.

Works

We've completed the earthworks and sewer relocation. This month we will continue with some minor civil works inside the site, along with equipment and plant deliveries. We will also begin electrical work on our new equipment at 203 York Street (see map on the next page).

When

Weekdays between **7am and 5pm**.

Powerline works and restricted parking

Between **Monday, 20 October and Friday, 7 November** we will be completing power pole and line works on York Street between Little Dodds Street and King Street South (as per the map on the next page).

During works on **Wednesday, 5 November** there will be **no on-street parking** between **Larter Street and King Street South**.

Some customers may have up to two planned power outages during this period. You will receive separate power outage notifications if your property is affected.

Footpath temporary closure

During **October 2025** the footpath between our site at 203 York Street and Pennyweight Gully will be closed temporarily to allow us to complete ongoing works.

What to expect

- Large machinery, including excavators, trucks and specialised equipment, will be used throughout the works.
- Power equipment will continue to be delivered and installed, with traffic management in place as required.
- Trucks and other vehicles will be frequently moving in and out of the site during construction hours, primarily via our Callow Street/Larter Street entrance heading towards Main Road.
- We will also from time to time access the site via York Street.
- Some works may generate noise at times.
- Powercor crews and authorised contractors will carry out all works.
