## Ballarat East Zone Substation Site establishment early works and bus stop relocation May 2025

Powercor is building a new substation in Ballarat East to enhance the city's energy network and ensure ongoing reliable power access for homes and businesses.

### Upcoming works

We will soon begin early site setup works on our land at 203 York Street, Ballarat East, in preparation for construction of the future Ballarat East Zone Substation (see map on the next page).

### When

We will start this work during the **week beginning 26 May 2025**. Work will be conducted **between 8am and 5pm on weekdays**.

Construction will begin after these early works are finished. We will be back in touch with more information before we begin construction.

### Bus stop temporary relocation

From first service **Monday, 2 June to last service Monday, 30 June 2025**. The Pennyweight Park/York Street Bus stop on Bus Route 20 (to Canadian) will be temporarily located 20 metres before the original bus stop.

### What to expect

- We will be installing temporary fencing, access gates and site facilities.
- We will be using machinery, equipment, vehicles and tools to support site setup activities.
- Some of the activities may generate noise at times.
- Vehicle and pedestrian access around the worksite will always be maintained. If needed, traffic control may be in place to help guide motorists and pedestrians safely around the area.
- Powercor crews and authorised Powercor contractors will complete the works.
