CitiPower and Powercor Negotiated Distribution Services Quarterly Reporting

1 July 2026 to 30 September 2026

30 October 2026

Table of Contents

Purpose 2

Pole Access Agreement applications 2

Site License applications 2

Site License applications not proceeding 3

Purpose

This quarterly report has been prepared in accordance with the approved Negotiating Framework and provides a summary of negotiations concluded with service applicants during the reporting period. Consistent with the Australian Energy Regulator's (AER) requirements, CitiPower and Powercor are to publish a quarterly summary of negotiation outcomes following the conclusion of negotiations.

The purpose of this report is to provide negotiated distribution services by summarising the activity and outcomes for the reporting period.

This report provides stakeholders with insight into activities relating to **Electric Vehicle Charging Infrastructure (EVCI)** negotiated connections and includes:

- The number of applications received during the reporting period.
- The number of applications concluded during the reporting period.
- The number of applications that resulted in an agreement.
- The number of applications that did not result in an agreement.

Pole Access Agreement applications

Applications for asset rental services relating to Electric Vehicle Charging Infrastructure (EVCI) must be negotiated in accordance with the Negotiated distribution service framework. CitiPower and Powercor define these agreements as Pole Access Agreements.

This table details the number of applications for a Pole Access Agreement which were received and/or concluded during the reporting period from **1 July 2026 to 30 September 2026.**

Customer ID	Distributor	Application received	Agreement issued	Time to offer	Agreement executed
VPNEVCI3	CitiPower	13 July 2026	14 July 2026	1 day	Yes
VPNEVCI3	Powercor	13 July 2026	14 July 2026	1 day	Yes

Site License applications

In accordance with CitiPower and Powercor's Pole Access Agreements, customers must submit an application for each site where they propose to install EVCI on a distributor pole. If the application is approved, the customer is issued an Access Licence for that site.

This table details the number of licence applications received and/or concluded during the reporting period from **1 July 2026 to 30 September 2026.**

Customer ID	Site ID	Network	Application date	License issued	Time to offer	Licence executed
VPNEVCI3	NIL	CitiPower	NIL	NIL	NIL	NIL
VPNEVCI3	NIL	Powercor	NIL	NIL	NIL	NIL

Site License applications not proceeding

This table details the sites that were withdrawn, not accepted or cancelled at either licence or connection stage, during the reporting period from **1 July 2026 to 30 September 2026.**

Customer ID	Site ID	Network	Application date	Outcome	Reason
NIL	NIL	NIL	NIL	NIL	NIL
