

## **Disclaimer**

The purpose of this map is to provide information about generation capacity and existing generation constraints on Powercor's sub-transmission network, along with some basic technical data. This map is intended as a guide only and not to be used for making decisions to invest in generation, transmission or distribution capacity.

Whilst care was taken in the preparation of the information on this map, and it is provided in good faith, Powercor accepts no responsibility or liability for any loss or damage that may be incurred by any person acting in reliance on this information or assumptions drawn from it.

This map contains network data based on its configuration at a point in time, and by its nature, the network may change from time to time without notice and should therefore be confirmed with Powercor before any action is taken based on this map.

Powercor advises that anyone proposing to use the information in this map should verify its reliability, accuracy and completeness before committing to any course of action. Powercor makes no warranties or representations as to the map's reliability, accuracy and completeness and Powercor specifically disclaims any liability or responsibility for any errors or omissions.

Information is intended as indicative only, based on system normal conditions. Any proposed generators may be constrained during abnormal or outage events subject to studies carried out through a formal connection application.

Any further information can be provided through the application process via this webpage.

## **Data sources**

Metering where available;

Powercor circuit data sheets;

2015 Powercor Distribution Annual Planning Report (DAPR), available online;

2015 Transmission Connection Planning Report (TCPR), available online;

2015 AEMO Annual Fault Level Report (AFLR), available online.
