

This little inconvenience will save us from a big one.

Work in progress:
Brunswick
May 2020 - June 2021

We're upgrading our network in Brunswick.

Soon, our Brunswick network will be even more reliable with critical upgrade works taking place across the network from May.

We'll be modernising some assets and decommissioning others in your community. To do this, we need to:

1. Decommission the Brunswick Zone Substation on Brunswick Road.
2. Upgrade the West Brunswick Zone Substation on Albert Street.
3. Install new underground cables along a 2.4km route from Fallon Street, heading down Dawson Street, Glenlyon Road, Ewing Street and finishing up at Barkly Street.

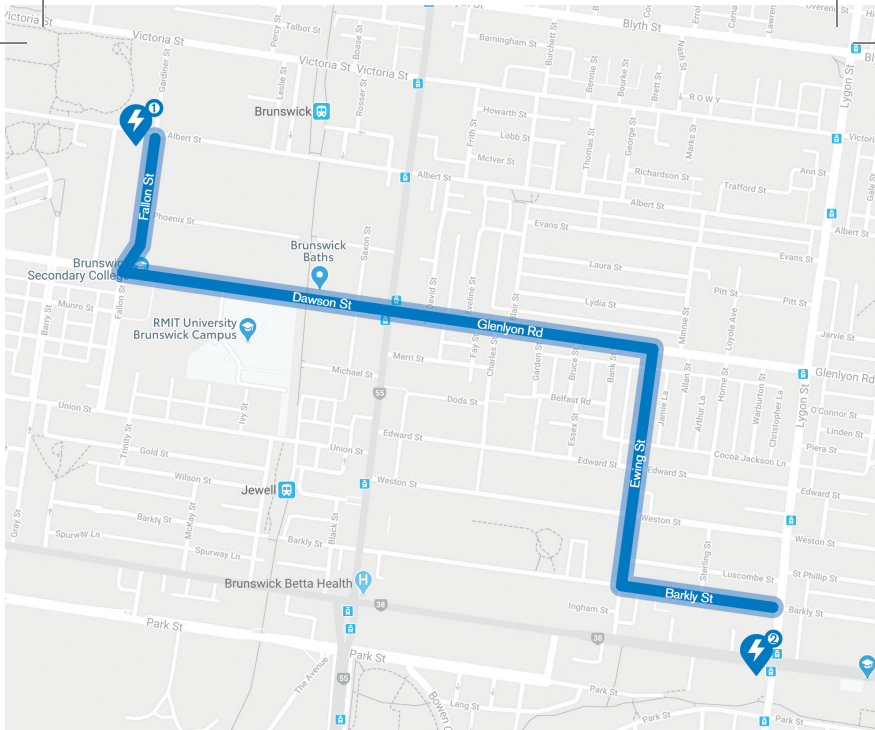

While we complete these critical works, you may notice a few disruptions to traffic, public transport and power supplies. Minimising disruptions as much as possible is a big priority for us, and we promise to give you plenty of notice about any necessary planned power outages well in advance.

For project updates, local news and giveaways join our Facebook group at www.facebook.com/groups/citipower.brunswick or scan the QR code.

Good people

Underground cables will be installed along this 2.4 km stretch with critical works starting in May. We expect the underground cable work and work in both substations to be completed by June 2021. We'll keep you up to date on our progress as we go.

1. West Brunswick Zone Substation
2. Brunswick Zone Substation
