

2020 RECOGNISED CONTRACTORS LIST FOR CUSTOMER INITIATED AUGMENTATION WORKS

Powercor maintains and publishes a list of “recognised” contractors known as the Recognised Contractors List for Customer Initiated Augmentation Works: <https://www.powercor.com.au/working-with-us/suppliers/forms-reports-and-bulletins/recognised-contractors/>

This Recognised Contractors List is provided on the basis the customer has exercised their option to seek alternative prices for the augmentation work associated with providing an electricity supply to their property.

Powercor does not provide any warranty in regard to the contractors included on the following pages of this list. The contractors have met minimum electricity industry skill requirements to undertake the work. Inclusion on this list does not imply competency or capability beyond the minimum skill requirement. Nor does inclusion on the list imply any comment on the business skills and practices or quality of the contractors listed.

A customer using this list to seek quotes and subsequently engaging a contractor will need to ensure that the contractor is “Recognised” for the particular type of work required. The customer will be directly entering into the contract to provide the services required with the contractor. Powercor will not engage the contractors on behalf of the customer. The contractors listed on the following pages can not undertake live work on the Powercor distribution system when engaged by the customer.

Applications for inclusion as a Recognised Contractor

Companies or individuals wanting to be endorsed for inclusion on the Recognised Contractor List should refer to the “Guidelines – Recognition of Contractors” and “Endorsement Prerequisites” and submit separate “Application’s” for each company/individual to: fieldauditandquality@powercor.com.au

NOTES:

Project Management

All projects must have a Project Manager who is appointed by the customer. The Project Manager can be the customer’s electrical contractor, principle contractor, civil consultant or any other party that has been assessed and recognised by Powercor. Refer to “Guidelines – Project Manager” for detailed information.

PM1: Project Manager, Minor

Nominated by the customer/client for minor type projects –

- underground and/or overhead reticulation up to 22kV for a single customer with a load up to 500kVA
- underground and/or overhead reticulation up to 22kV for a domestic/commercial/ industrial development up to 5 lots but excludes any staged developments

PM2: Project Manager, Major

Nominated by the customer/client for both minor (as above) and major type projects –

- underground and/or overhead reticulation up to 22kV for a single customer where the load exceeds 500kVA
- underground and/or overhead reticulation up to 22kV for a domestic/commercial/ industrial developments for 6 or more lots including all staged developments

U10: Cable Detailers - Recognition List

The “List of Recognised Cable Detailers”, U10 is managed separately by Powercor Technical Records and Drafting Services; email: TR&DS@powercor.com.au

O2, O3, O4 & O5: Overhead Works – Tasks

Powercor has a regulatory obligation to provide customers with the option to engage contractors to undertake construction works, provided those works do not involve working on Powercor assets; however, there are no regulatory obligations to allow contestability of design services.

Whilst there is no regulatory obligation, Powercor permits developers to engage design contractors as this has proven to represent an efficient process. For some time Powercor has no requirement to increase the list of approved Overhead Design contractors and as such the Design category for overhead works is not currently available.
