

This little inconvenience will bring big things.

**Work in progress:
Richmond
July 2020 - Early 2021**

We're upgrading our network in Richmond.

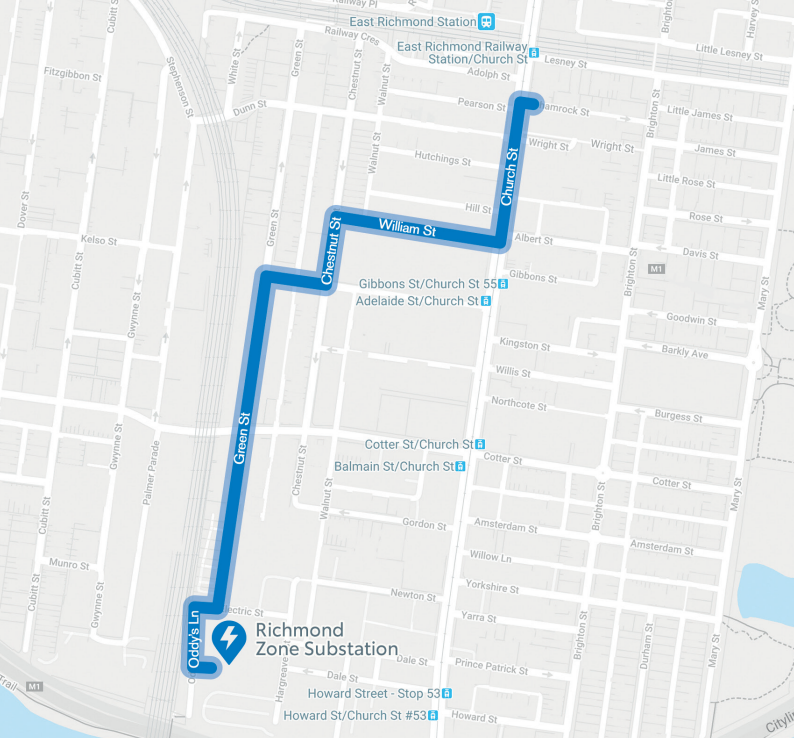

As Richmond's energy demand grows, we're working hard to upgrade our network to keep electricity supplies reliable for everyone.

While we work to connect new commercial developments in the area, we are taking the opportunity to also expand the capacity of the network. This year's upgrade will be the biggest piece of work required in the area for the foreseeable future, ensuring we continue delivering electricity with 99.99% reliability.

As we complete these critical works, you may notice disruptions to local parking, traffic and public transport. Minimising disruptions as much as possible is a big priority for us, and we will work closely with residents and businesses during the planning and delivery of these works.
