

This little inconvenience will bring big things.

**Work in progress:
Collingwood and Fitzroy
March - August 2021**

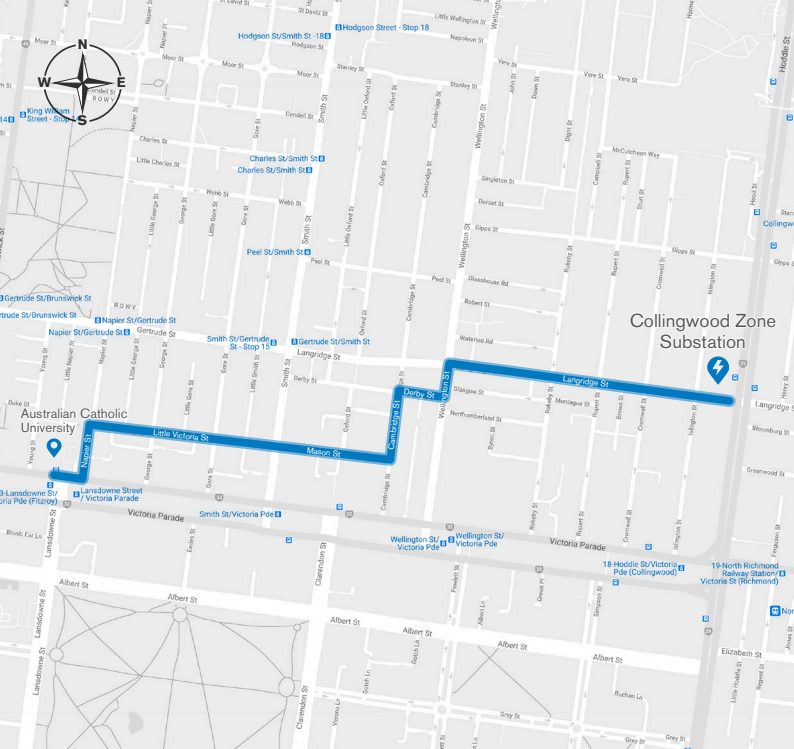

We're upgrading our network in Collingwood and Fitzroy.

Energy demand is growing across Collingwood and Fitzroy, so we're working hard to upgrade our network to keep electricity supplies reliable for everyone.

We're building more capacity in the local network to support the exciting growth of vibrant education, residential and commercial developments in the neighbourhood.

As we complete our works, you may notice disruptions to traffic, local parking and your power. Minimising disruptions is a big priority for us, and we promise to give you plenty of notice about our work and any necessary planned power outages well in advance.
