

Grant Recipients – 22/23 Season

Round Five

Club	Grant	Description
Camperdown Cricket Club	\$4,000	Camperdown Cricket Club experienced substantial flooding during a major rainstorm in southwest Victoria last year, resulting in water entering the club rooms. They will utilise the grant to remove exposed wires from the floor and install new power outlets in the kitchen to offer safe access and reduce the use of extension cords.
Carlisle Park Vikings Cricket Club	\$5,000	The funds will be used to replace a refrigerator that has reached the end of its useful life for this modest and proud club. Due to the broken-down fridge, most game days are run from a few eskies.
Malmsbury Cricket Club	\$5,000	The Malmsbury Cricket Club was affected by the recent Victoria floods when the Coliban River burst its banks. All electrical items in the club canteen were flood damaged and so made ineffective because of the flooding in the clubrooms. The grant money will be used to replace water-damaged electrical items.
MKM Cricket Club	\$5,000	MKM Cricket Club will upgrade its electrical equipment to commercial quality and install electrical outlets where appliances are located to reduce the use of extension leads and power boards with grant funding.
Murchison Cricket Club	\$5,000	Murchison Cricket Club's 150th anniversary was not off to a good start when their clubroom was damaged by recent floods in Victoria. Flood water destroyed the fridge and freezer, and grant funding will be used to replace both items.
North Dandenong Cricket Club	\$5,000	North Dandenong Cricket Club, a modest proud team in the Dandenong District Cricket Association, will utilise grant money to replace a bain marie and chest freezer that are nearing the end of their lives.
Old Carey Cricket Club	\$3,000	Because their sports complex was in a flood zone, the Old Carey Cricket Club endured substantial flooding to their clubroom. The water that penetrated the equipment shed was hip-high. A drink mixer named "Casper" who had been with the club for 20 years was destroyed. Grant funding will enable the club to purchase Casper V2.
Parkfield Cricket Club	\$5,000	Parkfield Cricket Club will be able to repair and replace a refrigerator and freezer that are tripping the safety switch in the club canteen thanks to grant funding.

Preston Baseballers Cricket Club	\$5,000	Preston Baseballers Cricket Club's present oven has reached the end of its useful life. Because of the clubroom's age, the club will also use grant funds to have their electrical board audited/serviced to ensure that there are no hidden or hazardous risks.
Surrey Hills Cricket Club	\$5,000	The Surrey Hills Cricket Club's bar fridge is approximately 40 years old and struggles to maintain temperature. They were told that the expense of repairing the fridge would be greater than the value of the fridge. The grant money will be utilised to replace the fridge.
Wandella Cricket Club	\$5,000	The Wandella Cricket Club, which is located in Kerang, was impacted by the October/November floods. New kitchen appliances will be purchased from the local Betta Electrical store who have also had a tough time due to the floods.
West Warrion Cricket Club	\$4,000	The West Warrion Cricket Club's canteen oven is their immediate priority and will be replaced as soon as possible due to an electrical fault.
